DETAILED ACTION

The amendment filed September 21, 2000 has been entered. 1.

Drawings

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed 2. on September 21, 2000 have been approved.

Claim Rejections - 35 USC § 112

3. Claims 1, 2 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4 is vague and indefinite since it appears that the invention is being positively defined in terms of the workpiece which is not part of the invention, and it is suggested to reinsert --for-- before "feeding" or the like.

Claim Rejections - 35 USC § 102/103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the 4. basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3724

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Roy et al.

Roy et al. discloses a cutting device with every structural limitation of the claimed invention including a first pair of rollers (e.g., 56, 62) which are coupled and thus driven together by a first motor; a cutting assembly (e.g., 60) which is driven by a second motor; a third motor (e.g., 84) pivoting one of the cutting assembly and the pair of rollers; a reading system having first (e.g., 58A) and second (e.g., 58B) spaced apart optical sensors; and a microprocessor (e.g., 30).

In the alternative, if it is argued that Roy et al. does not explicitly disclose a first motor and a second motor, the Examiner takes Official notice that such a configuration is old and well known in the art for various known benefits including providing separate control to individual components as desired. Therefore, it would have been obvious to one having ordinary skill in the art to provide a first and second motor for the well known benefits including that described above.

Claim Rejections - 35 USC § 103

7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Roy et al.

Roy et al. lacks the cutting assembly having first and second parallel spaced apart blades.

However, the Examiner takes Official notice that such a cutter configuration is old and well

known in the art and provides various well known benefits including facilitating the making of two

parallel cuts simultaneously for various well known benefits including cutting strips with parallel

borders. Therefore, it would have been obvious to one having ordinary skill in the art to provide

first and second parallel spaced apart blades for the well known benefits including that described

above.
